

Digitargos Ltd. is a group of experts in industrial metrology.

Precision, reliability, and speed:

Digitargos presents a useful concept in metrology for industrial production lines. We are specialized in in-line integrated metrology solutions using the most advanced technologies for quality and process control. Our tailor-made systems adapt to your company's needs in precise in-line measurement for 100% quality control and real time process control.

We offer different products in **vision, laser, electronic, electromechanical and air gages** for unlimited industrial applications in complex measurement systems. Through our consultancy services our clients get a concrete response to their metrology concerns and are guided in the direction of technological solutions that fit their needs.

Our competence is customized in-line turn-key systems

Turn your quality control into production!

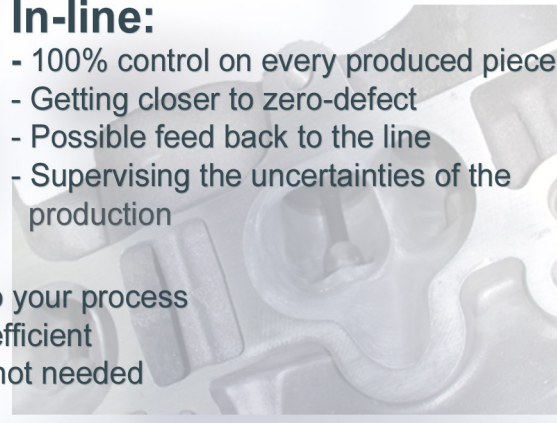

Customized:

- We learn your needs and production circumstances
- We deliver equipment that fits in best with your needs. They are made exclusively for you.

In-line:

- 100% control on every produced piece
- Getting closer to zero-defect
- Possible feed back to the line
- Supervising the uncertainties of the production

Turn-key:

- Fits best and natural way into your process
- The installation is short and efficient
- Ready to use, completion is not needed

Just press the button and have your quality controlled!

Branches that may need our services:

Automotive & its supplier (ancillary) industry, FMCG, Plastic, Sheet & float glas, Glas container

Digitargos Ltd.

Expert in the in-line integrated metrology

We deploy very different test and measuring tools, sensors, processes in order to customize our solutions that fit in best with our customers' needs. The arsenal is broad and strong. The sensors, tools, and processes implemented are:

(electro)mechanical, electronic (inductive, capacitive, incremental, etc.), optical, machine vision, ultrasonic, tactile, contact-free, air gage, etc.

Companies, which trust us:

DELPHI

PHILIPS

STRABAG

Johnson + Johnson

 **Yamanouchi**

ÖBB
